Mac OS 14 (Sonoma), Safari 17 Note HR3	Yes	Yes	Yes	Yes
Mac OS 14 (Sonoma), Firefox ESR 115 Note B	No	Yes	Yes	No

Table 1: EBS Application Notes are on page 2

[^] Latest Windows 10 Operating Systems tested is version 22H2 (released October 2022)

Using this Matrix:

- Find your Operating System and browser and move right across the row.
- Next, look down at the column of a specific EBS application for compatibility status and notes.
- A “Yes” indicates OS/browser combination is tested & supported for that EBS application.
- Refer to footnotes (next to “Yes”) for additional support information. Browser/OS combinations listed on this page are the only ones tested and supported for EBS.
- Currently, the best EBS results occur using Firefox Extended Support Release (ESR) with Windows, or Safari with MacOS.

Compatibility Notes: General

- EBS Compatibility Testing occurs annually, and for the most current version(s) of Windows and Apple Operating Systems (OS) and web browsers that are officially supported by EBS application vendors. Users with older OS and browser software versions should refer to their local technical support area for upgrade information and options.
- Only the “Extended Support Release” (ESR) version of Firefox is supported. For download link please click here: [Firefox ESR download](#).

Compatibility Notes: Analytics and Data Solutions (ADS/Cognos)

ADS1. This OS/browser combination is not supported for Cognos Query Studio.

Compatibility Notes: Finance (KFS, KCRA, MM, Marketplace)

No compatibility issues/notes currently.

Compatibility Notes: Human Resources/Payroll (EBS Portal, SAP)

HR1. The use of “Incognito”, “InPrivate” and “Private Browsing” modes in web browsers will prevent the upload and download of documents in many applications.

HR2. Only IE mode on the Edge browser supports Adobe Reader DC, needed to use Adobe Interactive Forms [such as some "HR/Payroll Forms & Cost Redistributions"]

HR3. Safari is the only supported browser on a Mac. HR/Payroll functionality not supported by Safari requires adding a virtual Windows environment using VMware software (only option).
