Table 1: Notes are on page 2

Using this matrix:

- Find your Operating System and browser and move right across the row.
- Next, look down the column of a specific EBS application for checkmarks and notes.
- A “Yes” indicates OS/browser combination is tested & supported for that EBS application.
- Refer to footnotes (next to “Yes”) for additional support information. Browser/OS combinations listed on this page are the only ones tested and supported for EBS.
- Best EBS results occur using Internet Explorer with Windows, or Safari with macOS.

Compatibility Notes

- A. Compatibility Testing occurs only against the two most current versions of Windows and Apple Operating Systems (OS), and web browsers that are officially supported by EBS application vendors. Users with older OS and browser software versions should refer to their local technical support area for upgrade information and options.
- B. Incognito, InPrivate and Private Browsing are not supported for SAP GUI for HTML applications when working with document uploads or downloads.
- C. Preferred browser for EBS Systems. For best results, add EBS Portal to Internet Explorer's Local Intranet "Sites"; see: "Local Intranet" Detailed Instructions.
- D. Only IE supports Adobe Reader DC, needed to use Adobe Interactive Forms [such as "Work Schedule Change Request," "Application to Retire" and some "HR/Payroll Forms & Cost Redistributions"]
- E. For pdf printing from KFS using IE, an installed PDF Viewer (such as Adobe Reader 11 or DC) is required. Note: Firefox ESR and Google have built in PDF viewers.
- F. Date Selector box on some Date fields only displays a partial calendar (last week of month not accessible/selectable). Manually enter date in this situation to continue.
- G. Only the Extended Support Release (ESR) of Firefox is supported. For information and installation instructions please see Firefox ESR section here: [Browser Versions & Settings](#)
- H. This OS/browser combination is not supported for Cognos Query Studio.
- I. Some KFS functions may redisplay a blank screen to the user. Scroll up the screen to locate and use navigation buttons.
- J. Safari is the only supported browser on a Mac. HR/Payroll functionality not supported by Safari requires adding a virtual Windows environment using VMware software (only).
- K. Spartan Marketplace does not work with this OS/browser combination; use Firefox ESR browser as a workaround.
